You can rely on us
to stand by our work
on each of your projects.
We recognize that the way
we work with you to deliver
your new lab matters as
much as the end product.

MATTHEW TEAL
President

Our promise to deliver lab-tested furniture systems starts with over 20 years experience working in the lab construction industry to help you plan and furnish your new lab—on spec, on time and on budget. This knowledge leads a smarter, more functional planning process, and the ability to spot and solve problems at an early stage. Our clients, some of the biggest names and labs in the business, rely on consultative relationships with New England Lab from start to finish; on jobs large and small.

From beginning to end, we collaborate with you to plan, build, and install your new lab with understanding of what's important to you.

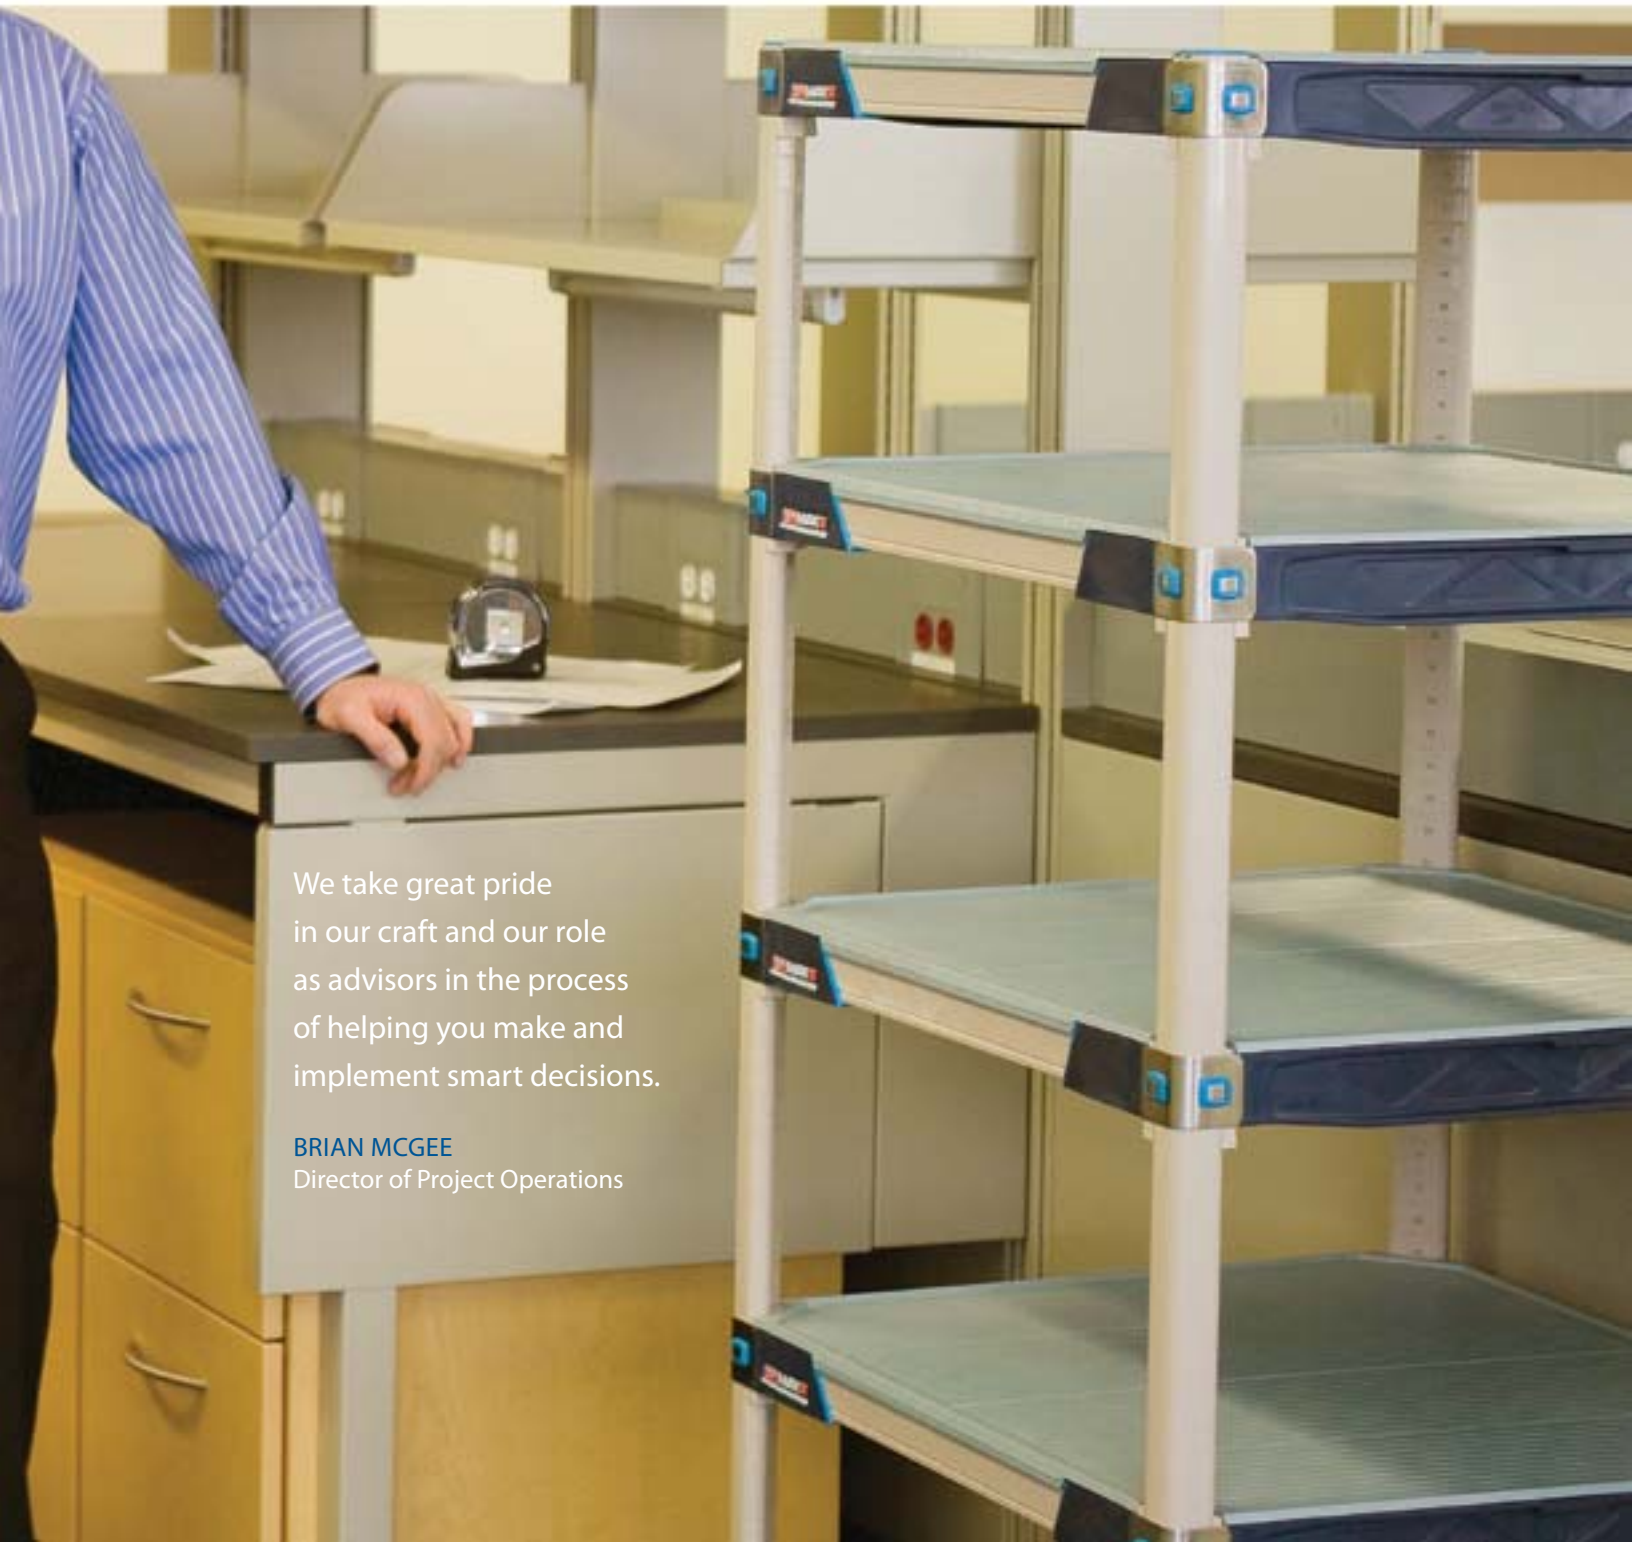

crafted with precision

Precision starts with the understanding of what's important to our contractor, architect and lab manager clients. We stand behind the integrity of our products and services. We work with high quality materials to build furniture systems with care. Labs are customized to your specifications and requirements to ensure that all parts and pieces fit together as planned.

Our commitment to lab-tested quality spans our full product line of fixed casework, adaptable furniture systems and fume hood offerings, as well as the accessories you need to complete your new lab.

We truly take pride in our craft. We work to find the right product fit and innovative designs to meet your timeline and budget. With our own manufacturing facility and relationships with top manufacturing partners who are willing to meet our standards, we have the flexibility to recommend and deliver the best solution for your needs.

A man in a blue and white striped shirt is leaning on a dark countertop. To his right is a tall, white metal shelving unit with four shelves. The shelves are made of a light-colored material with a blue border. The background shows a laboratory or office environment with various pieces of equipment and cabinets.

We take great pride
in our craft and our role
as advisors in the process
of helping you make and
implement smart decisions.

BRIAN MCGEE

Director of Project Operations

made right with service

A straight talk, satisfaction first service philosophy delivers assurance that New England Lab will do what we say and will always strive to make things right for you. We spend the time up front with you to set clear scope and timeline expectations. Our experience, team-approach to project management, and detailed shop drawings help provide smooth coordination with other trades. We sweat the details and are as tough on the punch list as you are. To us “lab-tested” means that you get the optimal information, design, and furniture you require—all guided by a knowledgeable, flexible and reliable team who understands that what we deliver is only as good as how and when we deliver it.

At New England Lab we understand the importance of working together as a team both within our company and with our clients. Our goal is to partner with you to deliver your new lab to your satisfaction.

new labs:

Lab-tested means three fundamental things: we'll understand what matters to you, take pride in our craft and products, and deliver service that makes your new lab right.
